

METALWAY INDUSTRIAL

HIGH PRECISION PARTS

Technology
Quality
Flexibility
Competitiveness

The company is certified by DQS according to the
ISO 9001 and ISO 16949 standards

We are a 100%
Brazilian company

MACHINED PARTS

Our precision machining sector has a wide range of Automatic Lathes, CNC lathes with moving head, CNC's Machining Centers and Multiple spindle lathes. All that enables great flexibility meeting our customers needs.

We work in the manufacture of parts and machining services to various sectors in the automotive, electronics and appliances markets, with high-tech equipment offering a wide range of services.

We manufacture engines shafts (in general), flow regulators, pinions for steering box, special high precision screws, castings, special fixing and fastening nuts, gears and other products.

STAMPED PARTS

Our stamping sector has a wide range of presses with capacity from 10 to 200 tons, which enables great flexibility meeting our customers needs.

We stamp various types of raw materials for cutting, bending and stretching processes in carbon steel, stainless steel, aluminum, brass and copper.

We are fully equipped with machining, welding, drilling machines, automatic saws and vibratory finishing equipments. If necessary, we also provide products with surface treatment: zinc, copper, silver, nickel, tin, and oxinitrocarbonitration, among others.

QUALITY ASSURANCE

A key commitment to METALWAY has always been the quality in all aspects which ensures the continuity of the Total Quality Assurance Program. And the ISO 9001 and ISO TS 16949 certificates obtained by the Awarding Body DQS Brazil are result of that commitment.

Always attentive to the worldwide quality standards, METALWAY is committed to offer technology, control, punctuality and flexibility in all aspects of the business to its valued customers.

RIVETS AND PINS

Our rivets division has a wide range of horizontal presses with up to 3 stages, which enables great flexibility meeting our customers needs.

We work with quality and speed in the development and manufacturing of solid pins, solid rivets and semi-tubular rivets.

Suitable for various applications such as fixing refrigerators compressors, showers resistance, windshield wiper systems, relays cores, fixing breakers for residential line, among others.

ABOUT US

METALWAY is headquartered in Brazil, São Paulo, with a factory area of 54.000 ft². We have been producing stamped and machined parts since 1992. Always strongly investing in the development and improvement of its production processes, the company consolidated its leading position in the Brazilian metallurgical market.

Our success is achieved through a philosophy of fully meeting our customers needs and expectations with continuous investments in the latest technology, equipments and the operational technical improvement of our employees.

Achieving excellence in manufacturing and marketing high quality products, offering reliability, safety and satisfaction to our business partners. For this reason, METALWAY relies on the following basic points:

Continuous investments in modern and high technology equipment;

Rigid and robust Quality Control and commitment to renewal and continuous improvement of the production processes;

Punctuality and flexibility to fully meet the needs and expectations of the market.

In the international scenario, the company is also present through exports to the US and the European market.
